Chapter 1. External Data Definitions

Chapter 2. Patient Preference for Screening

Patient preference for screening

◆ prompt: Preference

response: String (Single)

response range: EnumerationConstraint (List)

item: Screen as recommended

item: Screen on patient-preferred interval

item: Stop Screening

responseBinding: Property ("patientPreferredInterval")

Condition:elm:Equal (elm:Property("patientPreferredInterval" from: elm:ParameterRef (Responses)) elm:Literal())

prompt: Interval (years between screening)

response: Integer (Single)

prompt: Age (years)

response: Integer (Single)

responseBinding: Property ("patientAge")

◆ prompt: Postmenopausal?

response: Boolean (Single)

responseBinding: Property ("postmenopausal")

◆ prompt: Previously diagnosed with osteoporosis?

response: Boolean (Single)

Chapter 3. Age greater than or equal to 65 Years

Conditions
Condition: elm:GreaterOrEqual (elm:Property("patientAge" from: elm:ParameterRef (Responses)) elm:Literal())

prompt: Previously undergone DXA scanning?

re- Boolean (Single)

sponse:

responseBinding: Property ("previouslyUndergoneDXAScanning")

Condition: elm:IsTrue (elm:Property("previouslyUndergoneDXAScanning" from: elm:ParameterRef (Responses)))
<ul style="list-style-type: none">✱ prompt: Last DXA scan dateresponse: Timestamp (Single)✱ prompt: Most recent T-scoreresponse: Code (Single)response range: EnumerationConstraint (List)<ul style="list-style-type: none">item: Greater than or equal to -1.5([a997cc03-3e99-40eb-833a-6374c7750a3a Observation procedure (procedure)] ->(363702006 Has focus (attribute))->[3dfd49ed-a7e4-41a5-ab44-356015e345a2 Dual energy X-ray photon absorptiometry scan T score])item: Greater than -2.0 and less than -1.5([a997cc03-3e99-40eb-833a-6374c7750a3a Observation procedure (procedure)] ->(363702006 Has focus (attribute))->[3dfd49ed-a7e4-41a5-ab44-356015e345a2 Dual energy X-ray photon absorptiometry scan T score])item: Greater than or equal to -2.49 and less than or equal to -2([a997cc03-3e99-40eb-833a-6374c7750a3a Observation procedure (procedure)] ->(363702006 Has focus (attribute))->[3dfd49ed-a7e4-41a5-ab44-356015e345a2 Dual energy X-ray photon absorptiometry scan T score])

Chapter 4. Age Less Than 65 Years and Postmenopausal

Conditions
Condition: elm:And (elm:Less(elm:Property("patientAge" from: elm:ParameterRef (Responses)) elm:Literal())elm:IsTrue(elm:Property("postmenopausal" from: elm:ParameterRef (Responses))))

◆ History of fragility fracture?

prompt:

re- Boolean (Single)

sponse:

prompt: Body weight (pounds)

re- Integer (Single)

sponse:

◆ Bone loss caused by medication or disease?

prompt:

re- Boolean (Single)

sponse:

responseBinding: Property ("boneLossCausedByMedicationOrDisease")

Condition:elm:IsTrue (elm:Property("boneLossCausedByMedicationOrDisease" from: elm:ParameterRef (Responses)))

prompt: Medications

response: Code (Multiple)

response range: EnumerationConstraint (List)

item: Glucocorticoid therapy (5 mg per day for longer than 3 months)
([416118004 |Administration (procedure)] ->(260686004 |Method (attribute))->[129445006 |Administration - action (qualifier value)] ->(363701004 |Direct substance (attribute))->[116596006 |Glucocorticoid preparation (product)])

item: Anticonvulsant therapy greater than 2 years([416118004 |Administration (procedure)] ->(260686004 |Method (attribute))->[129445006 |Administration - action (qualifier value)] ->(363701004 |Direct substance (attribute))->[63094006 |Anticonvulsant (product)])

item: Hypogonadism([a997cc03-3e99-40eb-833a-6374c7750a3a |Observation procedure (procedure)] ->(363702006 |Has focus (attribute))->48130008 |Hypogonadism (disorder)])

item: Androgen deprivation therapy (ADT)(707266006 |Androgen deprivation therapy (procedure)|)

☞ item: Other

Details

prompt: Disease

response: Code (Multiple)

response range: EnumerationConstraint (List)

item: History of gastrectomy(53442002 |Gastrectomy (procedure)|)
item: History of malabsorption([a997cc03-3e99-40eb-833a-6374c7750a3a
|Observation procedure (procedure)] ->(363702006 |Has focus (at-
tribute))>[32230006 |Malabsorption syndrome (disorder)])
item: History of celiac disease([a997cc03-3e99-40eb-833a-6374c7750a3a
|Observation procedure (procedure)] ->(363702006 |Has focus (at-
tribute))>[396331005 |Celiac disease (disorder)])
item: History of metabolic surgery([a997cc03-3e99-40eb-833a-6374c7750a3a
|Observation procedure (procedure)] ->(363702006 |Has focus (at-
tribute))>[430715008 |Bariatric operative procedure (procedure)])

☞ item: Other

Details

◆ Parental history of fragility fracture?

prompt:

re- Boolean (Single)

sponse:

◆ Current tobacco smoker?

prompt:

re- Boolean (Single)

sponse:

◆ Alcoholism?

prompt:

re- Boolean (Single)

sponse:

◆ Rheumatoid arthritis?

prompt:

re- Boolean (Single)

sponse:

Chapter 6. Behavior Symbols

Table 6.1. Group Organizational Behavior

Sym- bol	Name	Definition
▶	Sentence Group	A group of related alternative actions is a sentence group if the item referenced by the action is the same in all the actions, and each action simply constitutes a different variation on how to specify the details for that item. For example, two actions that could be in a SentenceGroup are "aspirin, 500 mg, 2 times per day" and "aspirin, 300 mg, 3 times per day". In both cases, aspirin is the item referenced by the action, and the two actions represent two different options for how aspirin might be ordered for the patient. Note that a SentenceGroup would almost always have an associated selection behavior of "AtMostOne", unless it's a required action, in which case, it would be "ExactlyOne".
▷	Logical Group	A group with this behavior logically groups its sub-elements, and may be shown as a visual group to the end user, but it is not required to do so.
➤	Visual Group	Any group marked with this behavior should be displayed as a visual group to the end user.

Table 6.2. Group Selection Behavior

Sym- bol	Name	Definition
□	Any	Any number of the items in the group may be chosen, from zero to all.
⦿	All	All the items in the group must be selected as a single unit.
⦿	AllOrNone	All the items in the group are meant to be chosen as a single unit: either all must be selected by the end user, or none may be selected.
○	ExactlyOne	The end user must choose one and only one of the selectable items in the group. The user may not choose none of the items in the group.
✱	AtMostOne	The end user may choose zero or at most one of the items in the group.
⦿	OneOrMore	The end user must choose a minimum of one, and as many additional as desired.

Table 6.3. Required Behavior

Sym- bol	Name	Definition
◆	Must	An action with this behavior must be included in the actions processed by the end user; the end user may not choose not to include this action.

Sym- bol	Name	Definition
◇	Could	An action with this behavior may be included in the set of actions processed by the end user.
➤	MustUnlessDocumented	An action with this behavior must be included in the set of actions processed by the end user, unless the end user provides documentation as to why the action was not included.

Table 6.4. Precheck Behavior

Sym- bol	Name	Definition
▲	Yes	An action with this behavior is one of the most frequent actions that is, or should be, included by an end user, for the particular context in which the action occurs. The system displaying the action to the end user should consider "pre-checking" such an action as a convenience for the user.
▽	No	An action with this behavior is one of the less frequent actions included by the end user, for the particular context in which the action occurs. The system displaying the actions to the end user would typically not "pre-check" such an action.

Table 6.5. Cardinality Behavior

Sym- bol	Name	Definition
◆	Single	An action with this behavior may only be completed once.
❖	Multiple	An action with this behavior may be repeated multiple times.

Table 6.6. Item Flags

Sym- bol	Name	Definition
☞	fillIn	This item, in a list entry, allows the user to enter a fill in value that is not present in the set of presented choices.

Table 6.7. Read Only Behavior

Sym- bol	Name	Definition
☆	true	For a particular action or action group, specifies whether the elements are read only.
