# Preface

**Table 1. Revision History**

Date	Life Cycle Event
March 23, 2018	Reviewed
December 5, 2017	Pre-published
October 31, 2017	Created

**Table 2. Clinical White Paper Contributors**

Name	Role	Affiliation
Angela Denietolis, MD	Author	Primary Care Physician, James A. Haley Veterans Hospital, Tampa VAMC, Tampa, FL 33612
Pat Dumas, RN	Author	Clinical Program Director, VACO, 810 Vermont Ave NW, Washington, DL 20420
Manish Merchant, MD	Author	Health Informatician, Albany VAMC, 113 Holland Ave., Albany, NY 12208
Timothy Dresselhaus, MD	Author	Chief, Primary Care Service, San Diego VAMC - MEDS, 3350 La Jolla Village Drive, San Diego, CA 92161
Michael Icardi, MD	Author	Pathologist, Iowa City VAMC, 601 Highway 6 West, Iowa City, IA 52246

# Chapter 1. External Data Definitions

Triggers

**Table 1.1. newLaboratoryResult**

Trigger: type=DataEventTrigger, DataElementAdded
Expression: type=elm:Retrieve , dataType=ClinicalStatement, codeProperty=topic
Annotation: Any receipt of a laboratory result by the laboratory management system
Codes: elm:element[elm:Code]: [15220000  Laboratory test (procedure)]

---

# Chapter 2. Expression Definitions

**Table 2.1. criticalLabResultQuery**

Expression: type=elm:Query
Annotation: Value beyond the critical threshold (i.e., having a critical/panic value) laboratory result query
Codes: elm:operand[elm:Code]: [398166005  Performed (qualifier value)]elm:operand[elm:Code]: [[404684003  Clinical finding (finding)] ->(363714003  Interprets (attribute))->[386053000  Evaluation procedure (procedure)] ->(363713009  Has interpretation (attribute))->[eb5e7c0f-9e85-4c2c-a3f9-3cd17ac8af8e  Critically abnormal (qualifier value)]]

---

# Chapter 3. Primary Care: Panic Laboratory Value Alerts

Primary Care: Panic Laboratory Value Alerts

Notify the clinical provider of the critical threshold laboratory test result through the laboratory management system

actionSentence[type=elm:Instance, classType=anf:TSR-NoModel]

"topic: Communicate panic lab value result to the clinical provider for the panic lab value."

(Codes: )

---

# Chapter 4. Tabular List

## *Terminology Service Request (TSR) Mappings*

**Table 4.1. Terminology References**

System	Code	Display Text	References
SNOMED CT	15220000  Laboratory test (procedure)	Postcoordinated Expression	1
SNOMED CT	398166005  Performed (qualifier value)		1
SNOMED CT	[404684003  Clinical finding (finding)] ->(363714003  Interprets (attribute))->[386053000  Evaluation procedure (procedure)] ->(363713009  Has interpretation (attribute))->[eb5e7c0f-9e85-4c2c-a3f9-3cd17ac8af8e  Critically abnormal (qualifier value)]		1

# Chapter 5. Behavior Symbols

**Table 5.1. Group Organizational Behavior**

Sym- bol	Name	Definition
▶	Sentence Group	A group of related alternative actions is a sentence group if the item referenced by the action is the same in all the actions, and each action simply constitutes a different variation on how to specify the details for that item. For example, two actions that could be in a SentenceGroup are "aspirin, 500 mg, 2 times per day" and "aspirin, 300 mg, 3 times per day". In both cases, aspirin is the item referenced by the action, and the two actions represent two different options for how aspirin might be ordered for the patient. Note that a SentenceGroup would almost always have an associated selection behavior of "AtMostOne", unless it's a required action, in which case, it would be "ExactlyOne".
▷	Logical Group	A group with this behavior logically groups its sub-elements, and may be shown as a visual group to the end user, but it is not required to do so.
➤	Visual Group	Any group marked with this behavior should be displayed as a visual group to the end user.

**Table 5.2. Group Selection Behavior**

Sym- bol	Name	Definition
□	Any	Any number of the items in the group may be chosen, from zero to all.
⦿	All	All the items in the group must be selected as a single unit.
⦿	AllOrNone	All the items in the group are meant to be chosen as a single unit: either all must be selected by the end user, or none may be selected.
○	ExactlyOne	The end user must choose one and only one of the selectable items in the group. The user may not choose none of the items in the group.
⊛	AtMostOne	The end user may choose zero or at most one of the items in the group.
⦿	OneOrMore	The end user must choose a minimum of one, and as many additional as desired.

**Table 5.3. Required Behavior**

Sym- bol	Name	Definition
◆	Must	An action with this behavior must be included in the actions processed by the end user; the end user may not choose not to include this action.

Sym- bol	Name	Definition
◇	Could	An action with this behavior may be included in the set of actions processed by the end user.
➤	MustUnlessDocumented	An action with this behavior must be included in the set of actions processed by the end user, unless the end user provides documentation as to why the action was not included.

**Table 5.4. Precheck Behavior**

Sym- bol	Name	Definition
▲	Yes	An action with this behavior is one of the most frequent actions that is, or should be, included by an end user, for the particular context in which the action occurs. The system displaying the action to the end user should consider "pre-checking" such an action as a convenience for the user.
▽	No	An action with this behavior is one of the less frequent actions included by the end user, for the particular context in which the action occurs. The system displaying the actions to the end user would typically not "pre-check" such an action.

**Table 5.5. Cardinality Behavior**

Sym- bol	Name	Definition
◆	Single	An action with this behavior may only be completed once.
❖	Multiple	An action with this behavior may be repeated multiple times.

**Table 5.6. Item Flags**

Sym- bol	Name	Definition
☞	fillIn	This item, in a list entry, allows the user to enter a fill in value that is not present in the set of presented choices.
