Introduction

The VA is committed to improving the ability of clinicians to provide care for patients while increasing quality, safety, and efficiency. Recognizing the importance of standardizing clinical knowledge in support of this goal, VA is implementing the Health Level 7 (HL7) Knowledge Artifact Specification for a wide range of VA clinical use cases. Knowledge Artifacts, referred to as (KNARTs), enable the structuring and encoding of clinical knowledge so the knowledge can be integrated with electronic health records to enable clinical decision support.

The purpose of this Clinical Content White Paper (CCWP) is to capture the clinical context and intent of KNART use cases in sufficient detail to provide the KNART authoring team with the clinical source material to construct the corresponding knowledge artifacts using the HL7 Knowledge Artifact Specification. This paper has been developed using material from a variety of sources: VA artifacts, clinical practice guidelines, evidence in the body of medical literature, and clinical expertise. After reviewing these sources, the material has been synthesized and harmonized under the guidance of VA subject matter experts to reflect clinical intent for this use case.

Unless otherwise noted, items within this white paper (e.g., documentation template fields, orderable items, etc.) are chosen to reflect the clinical intent at the time of creation. To provide an exhaustive list of all possible items and their variations is beyond the scope of this work.

Conventions Used

Conventions used within the knowledge artifact descriptions include:

<obtain>: Indicates a prompt to obtain the information listed

- If possible, the requested information should be obtained from the underlying system(s). Otherwise, prompting the user for information may be required
- The technical and clinical notes associated with a section should be consulted for specific constraints on the information (e.g., time-frame, patient interview, etc.)
- Default Values: Unless otherwise noted, <obtain> indicates to obtain the most recent observation. It is recognized that this default time-frame value may be altered by future implementations

[...]: Square brackets enclose explanatory text that indicates some action on the part of the clinical user, or general guidance to the clinical or technical teams. Examples include, but are not limited to:

[Begin ...], [End ...]: Indicates the start and end of specific areas to clearly delineate them for technical purposes.

[Activate ...]: Initiates another knowledge artifact or knowledge artifact section.

[Section Prompt: ...]: If this section is applicable, then the following prompt should be displayed to the user.

[Section Selection Behavior: ...]: Indicates technical constraints or considerations for the selection of items within the section.

[Attach: ...]: Indicates that the specified item should be attached to the documentation template if available.

[Link: ...]: Indicates that rather than attaching an item, a link should be included in the documentation template.

[Clinical Comment: ...]: Indicates clinical rationale or guidance.

[Technical Note: ...]: Indicates technical considerations or notes.

[If ...]: Indicates the beginning of a conditional section.

[Else, ...]: Indicates the beginning of the alternative branch of a conditional section.

[End if ...]: Indicates the end of a conditional section.

☐: Indicates items that should be selected based upon the section selection behavior.

Chapter 1. Mental Health: Iraq & Afghanistan Post-Deployment Screen

1.1. Clinical Context

[Begin Clinical Context.]

This section is intended to facilitate identification of patients requiring war on terror Veteran post-deployment screening; support documentation of screening-related findings and decisions; and support initiation of appropriate clinical orders.

Table 1.1. Clinical Context Domain

<i>Target User</i>	Mental health providers, primary care providers (PCPs)
<i>Patient</i>	Combat Veterans of the war on terror
<i>Priority</i>	Routine
<i>Specialty</i>	Primary Care / Mental Health
<i>Location</i>	Outpatient

[End Clinical Context.]

1.2. Knowledge Artifacts

[Begin Knowledge Artifacts.]

This section describes the CDS knowledge artifacts that are intended for clinical providers caring for combat Veterans of the war on terror who present to a Primary Care Clinic or Mental Health Clinic.

Four knowledge artifacts define this clinical use case. These artifacts include 2 ECA Rules, a Documentation Template, and an Order Set, which the following sections describe in detail.

- ECA Rules: Iraq & Afghanistan Post-Deployment Screen Reminder and Iraq & Afghanistan Post-Deployment - Rule to Create Appropriate Order Set KNARTs
 - Rule logic for post-deployment screening reminder
 - Actions may include activating the documentation template or order set
- Documentation Template: Post-Deployment Screen KNART
 - Documents post-deployment screening associated findings and decisions
 - Includes logic for appropriate display of documentation sections
- Order Set: Post-Deployment Screen KNART
 - Orderable items associated with post-deployment screening
 - Includes logic for appropriate display of the order set

[End Knowledge Artifacts.]

Chapter 2. Event Condition Action (ECA) Rule: Iraq & Afghanistan Post-Deployment Screen Reminder

[Begin Event Condition Action (ECA) Rule: Iraq & Afghanistan Post-Deployment Screen Reminder.]

2.1. Knowledge Narrative

[Begin Knowledge Narrative.]

[See Clinical Context in Chapter 1.]

Upon returning from deployment, many combat Veterans of the war on terror successfully reintegrate into society; however, some have greater difficulty doing so. Problems these Veterans face include complex mental and physical problems, as well as financial challenges. Although programs exist for Veterans facing sequelae of deployment, Veterans with ongoing issues must be identified before they can benefit from such programs. Post-deployment Veterans should be screened for mental health–related problems such as posttraumatic stress disorder (PTSD), military sexual trauma, depression, suicidality, and alcohol abuse, as well as social welfare issues such as risk for homelessness and physical problems such as persistent infections, embedded fragments or shrapnel, and traumatic brain injury.

[End Knowledge Narrative.]

2.2. Iraq & Afghanistan Post-Deployment Screen Reminder

[Begin Iraq & Afghanistan Post-Deployment Screen Reminder.]

Events

[Begin Events.]

1. Any access of the patient record.
2. Upon first visit to a Primary Care or Mental Health provider in the VA system.

[End Events.]

Conditions

[Begin Conditions.]

1. Status as a Veteran who served in Iraq or Afghanistan after September 11, 2001 (post-deployment after return from combat service).
2. Absence of record of completed post-deployment screening (all questions answered in the survey).

[End Conditions.]

Actions

[Begin Actions.]

1. Create a communication request to the provider that patient is a candidate for post-deployment screening.
2. Open the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” documentation template KNART.

Event Condition Action (ECA) Rule:
Iraq & Afghanistan Post-
Deployment Screen Reminder

[End Actions.]

[End Iraq & Afghanistan Post-Deployment Screen Reminder.]

[End Event Condition Action (ECA) Rule: Iraq & Afghanistan Post-Deployment Screen Reminder.]

Chapter 3. Event Condition Action (ECA) Rule: Iraq & Afghanistan Post-Deployment Screen – Rule to Create Appropriate Order Set

[Begin Event Condition Action (ECA) Rule: Iraq & Afghanistan Post-Deployment Screen – Rule to Create Appropriate Order Set.]

3.1. Knowledge Narrative

[Begin Knowledge Narrative.]

[See Clinical Context in Chapter 1.]

[End Knowledge Narrative.]

3.2. Iraq & Afghanistan Post-Deployment Screen – Rule to Create Appropriate Order Set

[Begin Iraq & Afghanistan Post-Deployment Screen – Rule to Create Appropriate Order Set.]

Events

[Begin Events.]

Submission of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” documentation template KNART. (This event applies to all branches.)

[End Events.]

Conditions

[Begin Conditions.]

Any positive screen or finding recorded in the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” documentation template KNART that indicates a need for initiation of specialty evaluation, care management services, or social work services as described in the branches below.

[End Conditions.]

Actions

[Begin Actions.]

1. Linking to clinical practice guidelines.
2. Linking to other KNARTs.
3. Creation of the appropriate orders in the “Mental Health -Iraq & Afghan Post-Deployment Screen” order set KNART as described in the branches below.

[End Actions.]

3.2.1. Unexplained Fevers

Event Condition Action (ECA) Rule:
Iraq & Afghanistan Post-
Deployment Screen – Rule to Create
Appropriate Order Set

Events

[Begin Events.]

- Submission of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” documentation template KNART. (This event applies to all branches.)

[End Events.]

Conditions

[Begin Conditions.]

- Response of "Yes" to “Unexplained fevers since serving in the area of conflict?”

[End Conditions.]

Actions

[Begin Actions.]

1. Provide link to “General Clinical Note” documentation template KNART.
2. Provide link to “Generic E-Consult” documentation template-consult request KNART.
3. Display order for infectious diseases consult for unexplained fevers in the “Consults and Referrals” section of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” order set KNART.
4. Display order for patient education for unexplained fevers in Veterans who served in Iraq or Afghanistan after September 11, 2001, in the “Patient and Caregiver Education” section of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” order set KNART.

[End Actions.]

3.2.2. Chronic Diarrhea or Other Gastrointestinal Complaints

Events

[Begin Events.]

- Submission of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” documentation template KNART. (This event applies to all branches.)

[End Events.]

Conditions

[Begin Conditions.]

- Response of "Yes" to “Chronic diarrhea or other gastrointestinal complaints since serving in the area of conflict?”

[End Conditions.]

Actions

[Begin Actions.]

1. Provide link to “General Clinical Note” documentation template KNART.
2. Provide link to “Generic E-Consult” documentation template-consult request KNART.

Event Condition Action (ECA) Rule:
Iraq & Afghanistan Post-
Deployment Screen – Rule to Create
Appropriate Order Set

3. Display order for ova and parasites in the “Laboratory Tests” section of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” order set KNART.
4. Display order for gastroenterology consult in the “Consults and Referrals” section of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” order set KNART.
5. Display order for patient education for chronic diarrhea and other gastrointestinal complaints in Veterans who served in Iraq or Afghanistan after September 11, 2001, in the “Patient and Caregiver Education” section of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” order set KNART.

[End Actions.]

3.2.3. Persistent Papular or Nodular Rash

Events

[Begin Events.]

- Submission of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” documentation template KNART. (This event applies to all branches.)

[End Events.]

Conditions

[Begin Conditions.]

- Response of "Yes" to “Persistent papular or nodular rash since serving in the area of conflict?”

[End Conditions.]

Actions

[Begin Actions.]

1. Provide link to “General Clinical Note” documentation template KNART.
2. Provide link to “Generic E-Consult” documentation template-consult request KNART.
3. Display order for infectious diseases consult for persistent rash in the “Consults and Referrals” section of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” order set KNART.
4. Display order for patient education for persistent rash in Veterans who served in Iraq or Afghanistan after September 11, 2001, in the “Patient and Caregiver Education” section of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” order set KNART.

[End Actions.]

3.2.4. Possible Embedded Fragment or Shrapnel

Events

[Begin Events.]

- Submission of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” documentation template KNART.(This event applies to all branches.)

[End Events.]

Conditions

[Begin Conditions.]

Event Condition Action (ECA) Rule:
Iraq & Afghanistan Post-
Deployment Screen – Rule to Create
Appropriate Order Set

- Response of "Yes" to "Suspected or known embedded fragments or shrapnel as a result of serving in the area of conflict?"

[End Conditions.]

Actions

[Begin Actions.]

Provide link to an embedded fragments documentation template when one becomes available. In the interim:

1. Provide link to "General Clinical Note" documentation template KNART.
2. Provide link to "Generic E-Consult" documentation template-consult request KNART.
3. Display order for patient education for embedded fragments or shrapnel in Veterans who served in Iraq or Afghanistan after September 11, 2001, in the "Patient and Caregiver Education" section of the "Mental Health – Iraq & Afghanistan Post-Deployment Screen" order set KNART.

[End Actions.]

3.2.5. Possible Traumatic Brain Injury

Events

[Begin Events.]

- Submission of the "Mental Health – Iraq & Afghanistan Post-Deployment Screen" documentation template KNART. (This event applies to all branches.)

[End Events.]

Conditions

[Begin Conditions.]

- Response of "Yes" to "Suspected or known head injury resulting in alteration or loss of consciousness during deployment?"

[End Conditions.]

Actions

[Begin Actions.]

1. Provide link to "Neurology – TBI Screening" ECA Rule KNART.

[End Actions.]

[End Iraq & Afghanistan Post-Deployment Screen – Rule to Create Appropriate Order Set.]

[End Event Condition Action (ECA) Rule: Iraq & Afghanistan Post-Deployment Screen – Rule to Create Appropriate Order Set.]

Chapter 4. Documentation Template: Iraq & Afghanistan Post-Deployment Screen

[Begin Documentation Template: Iraq & Afghanistan Post-Deployment Screen.]

4.1. Knowledge Narrative

[Begin Knowledge Narrative.]

[See Clinical Context in Chapter 1.]

[End Knowledge Narrative.]

4.2. Iraq & Afghanistan Post-Deployment Screen

[Begin Iraq & Afghanistan Post-Deployment Screen.]

[Technical Note: This documentation template should be available to primary care and mental health providers caring for outpatients identified as candidates for the war on terror post-deployment screening.]

[Technical Note: Please auto populate the answers to the post-deployment status questions.]

[Section Prompt: Is the Veteran post-deployment after return from service in Iraq or Afghanistan after September 11, 2001?]

[Section Behavior: Select one. Optional.]

☐ Yes

<obtain> Dates

☐ No

[Link: Provide link to “Mental Health - PTSD Screening and Assessment” documentation template KNART.]

[Link: Provide link to “Mental Health – Military Sexual Trauma” documentation template KNART.]

[Link: Provide link to “Mental Health – Consult for Depression” documentation template-consult request KNART.]

[Link: Provide link to “Mental Health – Suicide Risk Assessment” documentation template KNART.]

[Link: Provide link to future KNART for Screening for Unhealthy Alcohol Use.]

[Link: Provide link to “Mental Health – Homelessness” documentation template KNART.]

4.2.1. Infectious Disease Screen

[Section Prompt: Unexplained fevers since serving in the area of conflict?]

[Section Behavior: Select one. Optional.]

☐ Yes

<obtain> Description

☐ No

[Section Prompt: Chronic diarrhea or other gastrointestinal complaints since serving in the area of conflict?]

[Section Behavior: Select one. Optional.]

☐ Yes

<obtain> Description

☐ No

[Section Prompt: Persistent papular or nodular rash since serving in the area of conflict?]

[Section Behavior: Select one. Optional.]

☐ Yes

<obtain> Description

☐ No

4.2.2. Embedded Fragment Screen

[Section Prompt: Suspected or known embedded fragments or shrapnel as a result of serving in the area of conflict?]

[Section Behavior: Select one. Optional.]

☐ Yes

<obtain> Description

☐ No

4.2.3. TBI Screen

[Technical Note: Note the existence of the “Neurology – TBI Screening” ECA Rule.]

[Section Prompt: Suspected or known head injury resulting in alteration or loss of consciousness during deployment?]

[Section Behavior: Select one. Optional.]

☐ Yes

<obtain> Description

☐ No

<obtain> Additional information

[Technical Note: The screening reminder should not be turned off until all questions have been answered.]

[End Iraq & Afghanistan Post-Deployment Screen.]

[End Documentation Template: Iraq & Afghanistan Post-Deployment Screen.]

Chapter 5. Order Set: Iraq & Afghanistan Post-Deployment Screen

[Begin Order Set: Iraq & Afghanistan Post-Deployment Screen.]

5.1. Knowledge Narrative

[Begin Knowledge Narrative.]

[See Clinical Context in Chapter 1.]

[End Knowledge Narrative.]

5.2. Laboratory Tests

[Begin Laboratory Tests.]

[Technical Note: This section of the order set should be provided to primary care providers and mental health providers following submission of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” documentation template. Specific orders should be displayed based on the actions described in the related branches of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen - Rule to Create Appropriate Order Set” ECA Rule.]

[Section Selection Behavior: Select one. Optional.]

☐ Ova and parasites stool (routine)

[End Laboratory Tests.]

5.3. Consults and Referrals

[Begin Consults and Referrals.]

[Technical Note: This section of the order set should be provided to primary care providers and mental health providers following submission of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” documentation template. Specific orders should be displayed based on the actions described in the related branches of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen - Rule to Create Appropriate Order Set” ECA Rule.]

[Section Selection Behavior: Select any or none. Optional.]

☐ Referral care management services evaluate need for care management services (now)

☐ Referral social services evaluate need for social services (now)

☐ Consult infectious diseases evaluate chronic unexplained fevers in Veteran who served in Iraq or Afghanistan after September 11, 2001 (now)

☐ Consult gastroenterology evaluate chronic diarrhea/other gastrointestinal complaints in Veteran who served in Iraq or Afghanistan after September 11, 2001 (now)

☐ Consult infectious diseases evaluate persistent rash in Veteran who served in Iraq or Afghanistan after September 11, 2001 (now)

[End Consults and Referrals.]

5.4. Patient and Caregiver Education

[Begin Patient and Caregiver Education.]

[Technical Note: This section of the order set should be provided to primary care providers and mental health providers following submission of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen” documentation template KNART. Specific orders should be displayed based on the actions described in the related branches of the “Mental Health – Iraq & Afghanistan Post-Deployment Screen - Rule to Create Appropriate Order Set” ECA Rule.]

[Section Selection Behavior: Select any or none. Optional.]

- ☐ Unexplained fevers in Veterans who served in Iraq or Afghanistan after September 11, 2001, patient education
- ☐ Chronic diarrhea and other gastrointestinal complaints in Veterans who served in Iraq or Afghanistan after September 11, 2001, patient education
- ☐ Persistent rash in Veterans who served in Iraq or Afghanistan after September 11, 2001, patient education
- ☐ Embedded fragments or shrapnel in Veterans who served in Iraq or Afghanistan after September 11, 2001, patient education

[End Patient and Caregiver Education.]

[End Order Set: Iraq & Afghanistan Post-Deployment Screen.]

Appendix A. Existing Sample VA Artifacts

All of the following artifacts/images are referenced from the Portland VA Medical Center (VAMC).

Patients who served in combat in either Operation Iraqi Freedom (Iraq, Kuwait, Saudi Arabia, Turkey) or in Operation Enduring Freedom (Afghanistan, Georgia, Kyrgyzstan, Pakistan, Tajikistan, Uzbekistan, The Philippines) should be screened for illnesses related to their service. Screening for PTSD, depression, problem alcohol use, infectious diseases, and embedded fragments should be part of the initial evaluation of these Veterans.

COHORT: veterans with separation date after 9/11/01. This finding is part of the reminder term: VA-IRAQ/AFGHAN PERIOD OF SERVICE and is determined by a computed finding.

An additional reminder term VA-ACTIVE DUTY is also available to cause patients to be part of the cohort. If a site wishes to screen active duty patients then the computed finding for VA-PATIENT TYPE should be added to the term with a condition of I V="ACTIVE DUTY".

Patients who have OEF/OIF service as recorded in the patient registration data are automatically part of the cohort and patients who did not serve in OEF/OIF are not included in the denominator.

RESOLUTION: entry of a health factor for NO IRAQ/AFGHAN SERVICE which is found in the reminder term IRAQ/AFGHAN SERVICE NO will resolve the reminder only if the patient does not have an entry of OEF/OIF service in the patient file. If the Veteran is known to have OEF/OIF service, based on the registration data then the location of service is not required.

If the veteran served in Iraq or Afghanistan as recorded in the patient registration data (File 1), then the patient must be screened or the registration data must be updated.

For all applicable patients who are not cognitively impaired: all the other items are required to resolve the reminder and must be completed after the date of the most recent service separation:

- a) screen for PTSD,
- b) screen for depression,
- c) screen for alcohol use,
- d) all 3 screening questions related to infectious diseases.
(The 4th question for embedded fragments is new as of the summer of 2008 and because of this, cannot be required at this time by the reminder logic).

The clinical maintenance will display information on which portions of the screen are not yet completed.

All of the individual elements of the screening tool are exported with attached health factors and reminder terms.

PTSD, depression and alcohol screening must be recorded in the MH package and the dialog for this reminder requires use of the MH instruments for these screens. Screens done prior to 10/1/08 using health factors will still resolve the reminder since those health factors are in the reminder terms that are part of the logic in this reminder.

The HFs for all of these screens should be entered in the site parameters as ones that cannot be added outside of a reminder dialog. Use the parameter ORWPCE EXCLUDE HEALTH FACTORS to exclude these from the electronic encounter forms. Entry of these health factors should ONLY occur during reminder dialog use.

Update October 2008 - patch PXRM*2*11 1. Health factors for PTSD screening, depression screening and alcohol screening are not allowed after 10/1/08 per the Office of Mental Health. 2. A HF for done elsewhere is included.

3. Combat vets need to be screened 4. The computed finding was removed from the reminder term for VA-ACTIVE DUTY since only a few sites screen active duty patients and patch 11 required an overwrite of this term. 5. Add embedded fragments question and remove other symptoms.

Update January 2009 - patch PXRM*2*12 1. Change combat vet screening requirement to OEF/OIF service based on recent data that these fields are more accurate. 2. Fix problem that active duty patients who did not serve in OEF/OIF have reminder continue to show as due. 3. Refusals of screening must be done after the most recent service separation.

General Patient Cohort Found Text:

Patients who served in combat in either Iraq (Operation Iraqi Freedom) or in Afghanistan (Operation Enduring Freedom) should be screened for illnesses related to their service. Screening for PTSD, depression, problem alcohol use, infectious diseases, and chronic symptoms should be part of the initial evaluation of these Veterans.

Customized PATIENT COHORT LOGIC to see if the Reminder applies to a patient:

```
((FI(2)!FI(19))&'FF(1))!((FI(3)&FF(20))&'FI(21))
```

Expanded Patient Cohort Logic:

```
((FI(VA-IRAQ/AFGHAN PERIOD OF SERVICE)!FI(VA-ACTIVE DUTY))&'FF(1))!
(FI(VA-IRAQ/AFGHAN SERVICE)&FF(20))&'FI(VA-COGNITIVE IMPAIRMENT)
```

Customized RESOLUTION LOGIC defines findings that resolve the Reminder:

```
((FI(16)&FF(16))!((FF(2)&(FI(16)!FI(7)!((FI(12)&FI(13)&FI(14)&FI(15))))&
((FF(3)&FI(4))!((FI(18)&FF(18))))&((FF(4)&FI(6))!((FI(17)&FF(17))))&
((FI(20)&FF(5))!((FF(5)&FI(10)&FF(6)&FI(8)&FF(7)&FI(11))!((FI(22)&FF(10))
```

Expanded Resolution Logic:

```
((FI(VA-REFUSED PTSD SCREEN)&FF(16))!((FF(2)&(FI(VA-REFUSED PTSD SCREEN)!
FI(VA-PTSD SCREEN)!((FI(VA-PTSD AVOIDANCE ALL)&
FI(VA-PTSD DETACHMENT ALL)&FI(VA-PTSD NIGHTMARES ALL)&
FI(VA-PTSD ON GUARD ALL))))&((FF(3)&FI(VA-DEPRESSION SCREEN OEF/OIF))!
(FI(VA-REFUSED DEPRESSION SCREENING)&FF(18))))&((FF(4)&
FI(VA-ALCOHOL USE SCREEN))!((FI(VA-REFUSED ALCOHOL SCREENING)&FF(17))))&
((FI(VA-REFUSED ID & OTHER SX SCREEN)&FF(5))!((FF(5)&
```

```
FI(VA-GI SYMPTOMS (IRAQ/AFGHANISTAN))&FF(6)&  
FI(VA-UNEXPLAINED FEVER (IRAQ/AFGHANISTAN))&FF(7)&  
FI(VA-PERSISTENT RASH (IRAQ/AFGHANISTAN)))!  
(FI(VA-OEF/OIF SCREEN DONE ELSEWHERE)&FF(10))
```

Figure A.2. Consult Order: Operation Enduring Freedom (OEF)/Operation Iraqi Freedom (OIF) Outpatient Case Management Program

The screenshot shows a software window titled "Order a Consult" with a standard Windows-style title bar (minimize, maximize, close buttons). The window is divided into several sections:

- Consult to Service/Specialty:** A list box containing "OEF/OIF Case Management Program Outpt", which is currently selected and highlighted in blue.
- Urgency:** A dropdown menu set to "ROUTINE".
- Attention:** An empty dropdown menu.
- Clinically indicated date:** A text input field with a calendar icon (three dots) to its right.
- Patient will be seen as an:** Two radio buttons: "Inpatient" (unselected) and "Outpatient" (selected).
- Place of Consultation:** A dropdown menu set to "CONSULTANT'S CHOICE".
- Provisional Diagnosis:** A text input field with a "Lexicon" button to its right.
- Reason for Request:** A large text area containing the text "Veteran deployed to Iraq or Afghanistan or in support of OEF since 9/11/2001".
- Clinical History:** A text area containing the text "Clinical History: test".
- Summary:** A yellow-highlighted box at the bottom left containing the text "OEF/OIF Case Management Program Outpt Cons CONSULTANT'S CHOICE".
- Buttons:** "Accept Order" and "Quit" buttons are located at the bottom right.

Figure A.3. Reminder Resolution: Operation Enduring Freedom (OEF)/Operation Iraqi Freedom (OIF) Post-Deployment Screen (image 1 of 3)

Reminder Resolution: Iraq&Afghan Post-Deployment Screen

WHY: Identify health problems that may be related to military service in Operations Enduring Freedom or Iraqi Freedom

WHO: All veterans who served in OEF or OIF is required and includes

WHAT: Screening for depression, PTSD, alcohol misuse, embedded fragments and symptoms of infection.

A paper version of these questions is available for the Veteran to complete, and the information can then be entered into the reminder dialog.

☐ 3. SCREEN FOR ALCOHOL: NOT CURRENTLY DUE (click here to repeat now)

4. SCREEN FOR INFECTIOUS DISEASES AND EMBEDDED FRAGMENTS

complete all open sections

A. Do you have any problems with chronic diarrhea or other gastrointestinal complaints since serving in the area of conflict?

☐ No

☐ Yes

(If 'YES', the patient's stool should be evaluated for ova and parasites because of the high rate of giardiasis and amoebiasis in Southwest Asia.)

B. Do you have any unexplained fevers?

☐ No

☐ Yes

(If 'YES', the patient should be evaluated for malaria infection and possibly visceral leishmania infection because of high rates of these diseases in Southwest Asia. Amoebic infection should again be considered.)

C. Do you have a persistent papular or nodular skin rash that began after deployment to Southwest Asia?

☐ No

☐ Yes

(If yes and an unusual rash or lesion is verified, the patient should be evaluated for cutaneous leishmaniasis.)

D. Do you have or suspect that you have retained fragments or shrapnel as a result of injuries you received
