# Models

**Table 5. Model References**

Referenced Model	Description
urn:solor.io:anf-model:1.0	VA Analysis Normal Form Model

---

# Chapter 1. External Data Definitions

No external data expression definitions and no trigger definitions are present.

---

# Chapter 2. Expression Definitions

No expression definitions are present.

---

## Chapter 3. Consults and Referrals

□ Referral gastroenterology evaluate for colonoscopy and treatment (routine)

actionSentence[type=elm:Instance, classType=anf:ClinicalStatement]

statementType: Precoordinated Expression 385644000 |Requested (qualifier value)|

topic: Precoordinated Expression 183523005 |Referral to gastroenterology service (procedure)|

purpose[0]: Postcoordinated Expression [386053000 |Evaluation procedure (procedure)] ->(363702006 |Has focus (attribute))->[73761001 |Colonoscopy (procedure)]

priority: Precoordinated Expression 50811001 |Routine (qualifier value)|

---

# Chapter 4. Patient and Caregiver Education

- Colorectal cancer surveillance education (routine)

actionSentence[type=elm:Instance, classType=anf:ClinicalStatement]

statementType: Precoordinated Expression 385644000 |Requested (qualifier value)|

topic: Postcoordinated Expression [243072006 |Cancer education (procedure)] -  
>(363702006 |Has focus (attribute))->[452071000124102 |Surveillance for colorectal cancer (regime/therapy)]

priority: Precoordinated Expression 50811001 |Routine (qualifier value)|

- Bowel prep for colonoscopy education (routine)

actionSentence[type=elm:Instance, classType=anf:ClinicalStatement]

statementType: Precoordinated Expression 385644000 |Requested (qualifier value)|

topic: Precoordinated Expression f165e620-5c1d-4289-b327-d41b4cf3eaac |Education about bowel prep for colonoscopy (procedure)

priority: Precoordinated Expression 50811001 |Routine (qualifier value)|

---

# Chapter 5. Tabular List

## *Terminology Service Request (TSR) Mappings*

**Table 5.1. Terminology Versions**

Name	Identifier	Version
SNOMED CT	2.16.840.1.113883.6.96	United States Edition 20180301

SNOMED CT	50811001  Routine (qualifier value)	Precoordinated Expression	4
SNOMED CT	5351000124100  Primary care clinic (environment)	Primary Care	1
SNOMED CT	[243072006  Cancer education (procedure)] -(363702006  Has focus (attribute))>[452071000124102  Surveillance for colorectal cancer (regime/therapy)]	Postcoordinated Expression	1
SNOMED CT	[370851004  Evaluation of diagnostic study results (procedure)] -(363702006  Has focus (attribute))>[363510005	Colorectal Cancer Diagnostic Evaluation	1

System	Code	Display Text <sup>a</sup>	References <sup>b</sup>
	Malignant tumor of large intestine (disorder)]		
SNOMED CT	[386053000  Evaluation procedure (procedure)] ->(363702006  Has focus (attribute))->[73761001  Colonoscopy (procedure)]	Postcoordinated Expression	1
SNOMED CT	f165e620-5c1d-4289-b327-d41b4cf3eaac  Education about bowel prep for colonoscopy (procedure)	Precoordinated Expression	1

<sup>a</sup>If a code is used multiple times in the KNART, only the display text of the first instance is shown.

<sup>b</sup>Count of the number of times the given code system and code pair is used in the KNART.

---

# Chapter 6. Behavior Symbols

**Table 6.1. Group Organizational Behavior**

Sym- bol	Name	Definition
▶	Sentence Group	A group of related alternative actions is a sentence group if the item referenced by the action is the same in all the actions, and each action simply constitutes a different variation on how to specify the details for that item. For example, two actions that could be in a SentenceGroup are "aspirin, 500 mg, 2 times per day" and "aspirin, 300 mg, 3 times per day". In both cases, aspirin is the item referenced by the action, and the two actions represent two different options for how aspirin might be ordered for the patient. Note that a SentenceGroup would almost always have an associated selection behavior of "AtMostOne", unless it's a required action, in which case, it would be "ExactlyOne".
▷	Logical Group	A group with this behavior logically groups its sub-elements, and may be shown as a visual group to the end user, but it is not required to do so.
➤	Visual Group	Any group marked with this behavior should be displayed as a visual group to the end user.

**Table 6.2. Group Selection Behavior**

Sym- bol	Name	Definition
□	Any	Any number of the items in the group may be chosen, from zero to all.
⦿	All	All the items in the group must be selected as a single unit.
⦿	AllOrNone	All the items in the group are meant to be chosen as a single unit: either all must be selected by the end user, or none may be selected.
○	ExactlyOne	The end user must choose one and only one of the selectable items in the group. The user may not choose none of the items in the group.
✱	AtMostOne	The end user may choose zero or at most one of the items in the group.
⦿	OneOrMore	The end user must choose a minimum of one, and as many additional as desired.

**Table 6.3. Required Behavior**

Sym- bol	Name	Definition
◆	Must	An action with this behavior must be included in the actions processed by the end user; the end user may not choose not to include this action.

Sym- bol	Name	Definition
◇	Could	An action with this behavior may be included in the set of actions processed by the end user.
➤	MustUnlessDocumented	An action with this behavior must be included in the set of actions processed by the end user, unless the end user provides documentation as to why the action was not included.

**Table 6.4. Precheck Behavior**

Sym- bol	Name	Definition
▲	Yes	An action with this behavior is one of the most frequent actions that is, or should be, included by an end user, for the particular context in which the action occurs. The system displaying the action to the end user should consider "pre-checking" such an action as a convenience for the user.
▽	No	An action with this behavior is one of the less frequent actions included by the end user, for the particular context in which the action occurs. The system displaying the actions to the end user would typically not "pre-check" such an action.

**Table 6.5. Cardinality Behavior**

Sym- bol	Name	Definition
◆	Single	An action with this behavior may only be completed once.
❖	Multiple	An action with this behavior may be repeated multiple times.

**Table 6.6. Item Flags**

Sym- bol	Name	Definition
☞	fillIn	This item, in a list entry, allows the user to enter a fill in value that is not present in the set of presented choices.

**Table 6.7. Read Only Behavior**

Sym- bol	Name	Definition
☆	true	For a particular action or action group, specifies whether the elements are read only.

---
