# **Chapter 1. External Data Definitions**

No externalData expression definitions and no trigger definitions are present.

# **Chapter 2. Expression Definitions**

No expression definitions are present.

# **Chapter 3. Laboratory Tests**

# Ova and parasites stool

actionSentence[type=elm:Instance, classType=anf:ClinicalStatement]

statementType: Precoordinated Expression 385644000 | Requested (qualifier value)|

topic: Precoordinated Expression 66719001 |Microbial ova-

parasite examination, fecal (procedure)

# Chapter 4. Consults and Referrals

# Referral care management services to evaluate need for care management services actionSentence[type=elm:Instance, classType=anf:ClinicalStatement]

statementType: Precoordinated Expression 385644000 |Requested (qualifier value)|

topic: Postcoordinated Expression [bf14b075-048b-4f18-9e4d-a170f3e32887 |Referral to care management service (procedure)] ->(363702006 |Has focus (attribute))->[392134007 | Care regimes management (procedure)]

# Referral social services to evaluate need for social services

actionSentence[type=elm:Instance, classType=anf:ClinicalStatement]

statementType: Precoordinated Expression 385644000 |Requested (qualifier value)|

topic: Postcoordinated Expression [306238000 | Referral to Social Services (procedure)] -> (363702006 | Has focus (attribute))-> [410606002 | Social service procedure (procedure)]

# Infectious diseases consult for unexplained fevers

actionSentence[type=elm:Instance, classType=anf:ClinicalStatement]

statementType: Precoordinated Expression 385644000 |Requested (qualifier value)|

topic: Postcoordinated Expression [ef732ceb-c7fa-4c91-91d5-bbca6184db62 |Infectious disease consultation and report (procedure)] ->(363702006 |Has focus (attribute))->[271807003 |Eruption of skin (disorder)]- ->(263502005 |Clinical course (attribute))->[62459000 |Chronic persistent (qualifier value)];

unstructured[0]: unexplained fevers

# Infectious diseases consult for persistent rash

actionSentence[type=elm:Instance, classType=anf:ClinicalStatement]

statementType: Precoordinated Expression 385644000 |Requested (qualifier value)|

topic: Postcoordinated Expression [ef732ceb-c7fa-4c91-91d5-bbca6184db62 |Infectious disease consultation and report (procedure)] ->(363702006 |Has focus (attribute))->[271807003 |Eruption of skin (disorder)]- ->(263502005 |Clinical course (attribute))->[62459000 |Chronic persistent (qualifier value)];

# Gastroenterology consult for chronic diarrhea and other gastrointestinal complaints actionSentence[type=elm:Instance, classType=anf:ClinicalStatement]

statementType: Precoordinated Expression 385644000 |Requested (qualifier value)|

topic: Postcoordinated Expression [50687007 | Digestive tract consultation and report (procedure)] ->(363702006 | Has focus (attribute))->[236071009 | Chronic diarrhea (disorder)]

unstructured[0]: And other gastrointestinal complaints

# Chapter 5. Patient and Caregiver Education

# Patient education for unexplained fevers in Veterans who served in Iraq or Afghanistan after September 11, 2001

actionSentence[type=elm:Instance, classType=anf:ClinicalStatement]

statementType: Precoordinated Expression 385644000 |Requested (qualifier value)|

<sup>&</sup>lt;sup>a</sup>If a code is used multiple times in the KNART, only the display text of the first instance is shown.

<sup>&</sup>lt;sup>b</sup>Count of the number of times the given code system and code pair is used in the KNART.

# **Chapter 7. Behavior Symbols**

**Table 7.1. Group Organizational Behavior** 

Symbol	Name	Definition
#	Sentence Group	A group of related alternative actions is a sentence group if the item referenced by the action is the same in all the actions, and each action simply constitutes a different variation on how to specify the details for that item. For example, two actions that could be in a SentenceGroup are "aspirin, 500 mg, 2 times per day" and "aspirin, 300 mg, 3 times per day". In both cases, aspirin is the item referenced by the action, and the two actions represent two different options for how aspirin might be ordered for the patient. Note that a SentenceGroup would almost always have an associated selection behavior of "AtMostOne", unless it's a required action, in which case, it would be "ExactlyOne".
#	Logical Group	A group with this behavior logically groups its sub-elements, and may be shown as a visual group to the end user, but it is not required to do so.
>	Visual Group	Any group marked with this behavior should be displayed as a visual group to the end user.

**Table 7.2. Group Selection Behavior** 

Symbol	Name	Definition
#	Any	Any number of the items in the group may be chosen, from zero to all.
#	All	All the items in the group must be selected as a single unit.
#	AllOrNone	All the items in the group are meant to be chosen as a single unit: either all must be selected by the end user, or none may be selected.
#	ExactlyOne	The end user must choose one and only one of the selectable items in the group. The user may not choose none of the items in the group.
0	AtMostOne	The end user may choose zero or at most one of the items in the group.
*	OneOrMore	The end user must choose a minimum of one, and as many additional as desired.

**Table 7.3. Required Behavior** 

Symbo	l Name	Definition
*	Must	An action with this behavior must be included in the actions processed by the end user; the end user may not choose not to include this action.
<b>\$</b>	Could	An action with this behavior may be included in the set of actions processed by the end user.

Symbol	Name	Definition
>	MustUnlessDocumented	An action with this behavior must be included in the set of actions processed by the end user, unless the end user provides documentation as to why the action was not included.

#### **Table 7.4. Precheck Behavior**

Symbol	Name	Definition
•	Yes	An action with this behavior is one of the most frequent actions that is, or should be, included by an end user, for the particular context in which the action occurs. The system displaying the action to the end user should consider "prechecking" such an action as a convenience for the user.
#	No	An action with this behavior is one of the less frequent actions included by the end user, for the particular context in which the action occurs. The system displaying the actions to the end user would typically not "pre-check" such an action.

#### **Table 7.5. Cardinality Behavior**

	Symbol	Name	Definition
	<b>♦</b>	Single	An action with this behavior may only be completed once.
Ì	*	Multiple	An action with this behavior may be repeated multiple times.

#### Table 7.6. Item Flags

S	ymbol	Name	Definition
	4	fillIn	This item, in a list entry, allows the user to enter a fill in value
			that is not present in the set of presented choices.

### Table 7.7. Read Only Behavior

Symbo	Name	Definition
#	true	For a particular action or action group, specifies whether the elements are read only.
